RE:

2000 Third Quarter Water Monitoring, Canyon Fuel Company, Banning Loadout,

~~CV0074001~~

1. Were data submitted for all of the MRP required sites? YES [X] NO []

Identify sites not monitored and reason why, if known:

The annual Truck Dump Sump sample was collected.

2. On what date does the MRP require a five-year re-sampling of baseline water data.

See Technical Directive 004 for baseline re-sampling requirements. Consider the five-year baseline re-submittal when responding to question one above. Indicate if the MRP does not have such a requirement.

Resampling Due Date

Renewal submittal due 6/24/03, renewal due 10/24/03. No commitment to re-sample for baseline parameters preceding re-permitting has been found in the MRP.

3. Were all required parameters reported for each site? YES [x] NO []

Comments, including identity of monitoring site:

Reviewed the only sample collected; the Truck Dump Sump. Analysis which was conducted but not addressed in the MRP include Dissolved Zinc, Total Alkalinity, and Cation-Anion balance.

4. Were irregularities found in the data?

YES [x] NO []

Comments, including identity of monitoring site:

A limited amount of data was available for analysis, but a high Field Specific Conductivity was collected. The TDS/SO4 ratio appears relatively stable while the Specific Conductivity is at a historic high. Will discuss with the operator in an upcoming joint inspector/hydro field visit.

5. Were DMR forms submitted for all required sites?

1st month, YES [X] NO []

2nd month, YES [X] NO []

3rd month, YES [X] NO []

Identify sites and months not monitored:

6. Were all required DMR parameters reported?

YES [X] NO []

Comments, including identity of monitoring site:

No discharge.

7. Were irregularities found in the DMR data?

YES [] NO [X]

Comments, including identity of monitoring site:

8. Based on your review, what further actions, if any, do you recommend?

No action necessary.
